There’s something happening in your fields … it’s nothing you can see, smell or taste, but it could have a big impact on your farm. It’s multiplying by the trillions daily. It’s in your soil, your crops and it’s even in your machinery. It travels in every rain droplet and every August GDU. That something is data … and in that data lies the knowledge to improve your management practices, reduce risk and increase yield on every acre you farm.

This is why AgriGold is investing in digital ag technologies and leading the digital transformation of the seed industry. While this is a very exciting time in agriculture, we also know it can mean uncertainty and apprehension for many as they look to integrate new digital tools into their farming practices.

To support you in this task, we are introducing a comprehensive plan that will allow you a simplified path to greater optimization and visibility over your farm, fields and operation.

We’re introducing a new section to our profile guide this year. Here we’ll discuss ways you can integrate tools like Advantage Acre into your current farming practices.

**PRE-PLANT**
- Optimize your seed plan
- Gain insight on hybrid placement
- Improve on-farm communication

**IN-SEASON**
- Improve field visibility
- Insight to plant health
- Mitigate risk

**HARVEST**
- Analyze results
- Gain insight into performance
- Utilize data + analytics
ADVANTAGE ACRE
PLANNING

We've combined our knowledge of our genetics, the comprehensive understanding of soil and WeatherTrends360® advanced forecast to assign a productivity index to each unique environment.

With this enhanced, dynamic knowledge our recommendations may change from year to year. Rely on our AgriGold Representatives to help you place the right genetics on the right acre. Starting with a sound seed and agronomic plan will help guide decisions throughout the season.

WHAT WILL THE WEATHER BE LIKE THIS YEAR?

REVIEW 11-MONTH WEATHER FORECASTING
Get a clearer picture of future conditions with WeatherTrends360® to make more proactive decisions on your farm without using previous years’ data.

WHAT’S MY HYBRID PLACEMENT + POPULATION PLAN?

TUNE FIELD-BY-FIELD PLANNING
Understanding how to maximize your seed’s potential begins with genetic knowledge. Utilize our field-by-field planning approach to reduce risk and maximize yield.

HOW DO I DETERMINE FERTILIZER + TILLAGE PRACTICES?

STUDY FUNCTIONAL SOIL MAPS
While standard USDA soil maps generally classify and name soil types as broad units based on appearance, functional soil mapping focuses on soil behavior and topography with a three-dimensional approach.

HOW DO I REDUCE RISK?

STRATEGIC PRODUCT PLACEMENT
AgriGold classifies every one of its hybrids into genetic families based on its genetic background and agronomic characteristics. Knowing a hybrid’s genetic family helps simplify management, reduce risk and maximize results in your field.
Ensuring proper seed placement is critical to obtaining higher yields. Optimize your planting practices by using our seeding recommendations for static and variable rate planting.

Utilize our test blocks to validate appropriate planting populations on every acre. To have a premier in-cab experience, pair our recommendations with Climate FieldView® to experience real-time results.

Utilize the timeline feature in Advantage Acre to help determine when an optimal planting date might be. |

| **WHAT IS THE BEST PLANTING DATE?** |

| **EXPORT VR RECOMMENDATIONS** |
Easily export your seeding plan to your monitor or link it to your cab using MyJohnDeere or Climate FieldView®. |

| **WHAT IS MY OPTIMAL SEEDING RATE?** |

| **TEST BLOCKS** |
Easily set up test blocks to determine the best population on each field by creating seeding recommendations in Advantage Acre. |

| **HOW DO I VALIDATE MY SEEDING RATE?** |

| **ENHANCE IN-CAB VISIBILITY** |
Pair Advantage Acre’s recommendations and timeline feature to help make informed decisions with Climate FieldView®’s in-cab features to make on-the-go decisions. |

| **HOW DO I INCREASE MY EFFICIENCY?** |
ADVANTAGE ACRE VIEW

Mitigate risk by monitoring your crop all summer long. Work with your local AgriGold Representative and the Advantage Acre® scouting app for enhanced visibility of your fields.

Using these tools can help gain greater insights into your plants’ health along with our complementary tools in collaboration with Climate FieldView™ and MyJohnDeere®.

ENHANCED VISIBILITY OF YOUR FIELD

GREATER INSIGHT INTO PLANT HEALTH

MITIGATE RISK

HOW IS MY CROP PROGRESSING?

ESTIMATED GROWTH STAGE DEVELOPMENT
Utilize GDU accumulations and the scouting app to monitor your plants’ health and determine how the plant will mature with this year’s weather forecast.

DO I NEED TO MODIFY APPLICATIONS?

REVIEW NITROGEN AVAILABILITY
Advantage Acre’s nitrogen availability tool can help you have a better understanding of the amount of nitrogen available and the amount of loss you have in each field.

DO I HAVE ANY CHALLENGE ZONES?

REAL-TIME MONITORING OF FIELD HEALTH
Use imagery to see your fields like never before by using Climate FieldView™’s Field Health Advisor.

UNCOVER VALUABLE FIELD INSIGHTS
Uncover valuable insights for next season with tools that help you analyze crop performance at the field level or by field zone. Use in-season imagery to identify issues early and take action to protect yield.

The FieldView™ services provide estimates or recommendations based on models. These do not guarantee results. Consult your agronomist, commodities broker and other service professionals before making financial, risk management, and farming decisions. Information and recommendations we provide do not modify your rights under insurance policies purchased through our affiliates. More information at http://www.climate.com/disclaimers.
Because of your access to information and enhanced visibility, you can make more informed decisions in-season.

The actionable insights derived from Advantage Acre® and other complementary platforms can help protect yield potential before harvest.

**PROACTIVE APPROACH**

**QUICKER REACTION TO CHALLENGES**

**PRECISION SOLUTION MANAGEMENT**

**REVIEW SCOUTING REPORTS**

Work with your local AgriGold Representative to make in-season decisions based on scouting activity and access in-season imagery through Climate FieldView®’s Field Health Advisor.

**APPLICATION STRATEGY**

Based on scouting notes and weather tracking, access the need for fungicide applications and optimum timing.

**UTILIZE VR NITROGEN**

Our VR nitrogen tool can aid in the estimation of available nitrogen and in the decision to apply more.

**ARE THERE VISIBLE IN-SEASON PRESSURES AND STRESSES?**

**DO I NEED TO APPLY FUNGICIDE?**

**ADDITIONAL NITROGEN APPLICATIONS?**

**OPTIMIZE YOUR INPUTS**

Optimize inputs to maximize yield and profit on every acre with variable rate seeding potential tools, nitrogen management tools and fertility scripting tools.

**AGRIGOLD REACT**
ADVANTAGE ACRE

HARVEST

Collecting harvest and yield data confirms visual cues on critical decisions made in your seed and agronomic plans.

Visual inspection from the combine along with in-cab analysis tools provide instant feedback.

REVIEW SCOUTING REPORTS
Advantage Acre’s scouting app has a unique feature to help you gauge your crops progress by estimating your yield potential.

UTILIZE ESTIMATED STAGE DEVELOPMENT
The timeline feature in Advantage Acre will calculate estimated plant stage development to help you make management and harvest timing decisions.

DETAILED WEATHER FORECASTS
Take a look into the future to aid your decision-making to find an optimal harvest window. WeatherTrends360 can help predict when the weather will be most ideal for harvest.

COMPARE
During harvest you can use instant, in-cab features with complimentary Climate FieldView® to help determine which decisions were most productive along with reviewing your Advantage Acre test blocks to validate your populations and plan for next year.
Easily analyze performance by hybrid, functional zone, cation exchange capacity and more by using our advanced analysis features in Advantage Acre® Plus and tools in Climate FieldView®.

Together, both platforms unlock enhanced field visibility to allow you to gain a deeper insight at a field-by-field level.
