

# TOP-NOTCH INPUT TRAITS

Genetics form the foundation of your seed-buying decisions. Matching the right genetic families and hybrids to your unique operation is the first step to a successful corn crop. Once the right hybrids are selected, protecting that yield with the right traits is the next step. AgriGold offers a simple approach to the complicated trait offerings in the industry, ranging from time-tested conventional products to the latest technologies.

# PREMIUM OUTPUT TRAITS

Developing hybrids to match specific environments is our business. That's why many of AgriGold's high-yielding hybrids meet the unique and varied output grain specifications of today's buyers. Our Specialty Products Team is constantly working with these buyers to determine the best hybrids for their processing needs.
