Product Features:

Potential Yield:	
Lower Yielding Fields	**Good**
Higher Yielding Fields	**Excellent**
Genetic Family:	**B**
Days to Flowering:	**71**
GDUs to Black Layer:	**2594**
Plant Height:	**Medium**
Ear Height:	**Medium**
Ear Flex:	**Flexible**
Kernel Texture:	**Medium**
Harvest Timing:	**Normal**
Foliar Fungicide Response:	**Moderate**

Headline AMP fungicide
RECOMMENDED

Strengths:

- Very good emergence and early vigor
- Excellent ear flex allows for high yield levels at varying plant populations
- Outstanding late season plant health and stalk integrity

Weakness:

- Limited movement North of primary area of adaptation

Management Tips:

- Adapted to highly productive soils
- Best suited for moderate to well drained soils
- Excellent choice for corn following corn systems

Corn After Corn Tips:

- Responds to late applications of nitrogen

Recommended Planting Population

Row Type	Low Yield Environment	Medium Yield Environment	High Yield Environment
30"	26-30,000	30-32,000	32-34,000
Narrow	26-30,000	30-32,000	32-34,000

Nitrogen Utilization

100% Preplant	Preplant & Sidedress	Starter & Sidedress
